

Managed Detection and Response Service

RAISING THE STANDARD OF MANAGED SECURITY

-  Fortification of security posture
-  Stop sophisticated threat actors
-  Deter future attacks
-  Visibility and measurement of your organization's environment and security posture

-  Intelligent triage to focus on the most critical incidents at the right time, leveraging QPASS™
-  Real-time threat context delivery to cut Mean Time to Detect and Respond (MTTD & MTTR)

The best value in (MDR) is provided by MSMNET Security. We are acutely aware of the collaborative nature of security. We collaborate closely with our partners and clients to provide solid groundwork for maturing Security Operations (SecOps) programs. Managed security services have been reimaged by our cloud SecOps platform and unwavering customer attention. As part of our high-touch Team model, we combine best-of-breed security tools like Security Incident and Event Management (SIEM) and Security Orchestration Automation and Response (SOAR) with our proprietary IP to automate security response.

Threat monitoring, alerting, validation, and proactive threat hunting are all included in our Managed Detection and Response (MDR) Service. We offer complete management of particular security technologies. Only the most sophisticated security events are alerted to our customers thanks to our cloud-based infrastructure, which is supported by world-class professionals. While consistently improving their entire security posture, our customers use our MDR Service to relieve their security staff of the time-consuming processes of adopting, managing, and integrating various cybersecurity systems.

Customers who use our MDR Service get a complete, white-glove solution for keeping track of information security threats across their entire organization. Using event monitoring of logs and human contextual analysis, incident alerting and response, incident case management, and threat hunting, we offer senior leaders, IT, and security staff round-the-clock monitoring of their organization's assets. To give a more precise threat-hunting context, we assign each custom-

er to one of our Teams and provide industry vertical expertise.

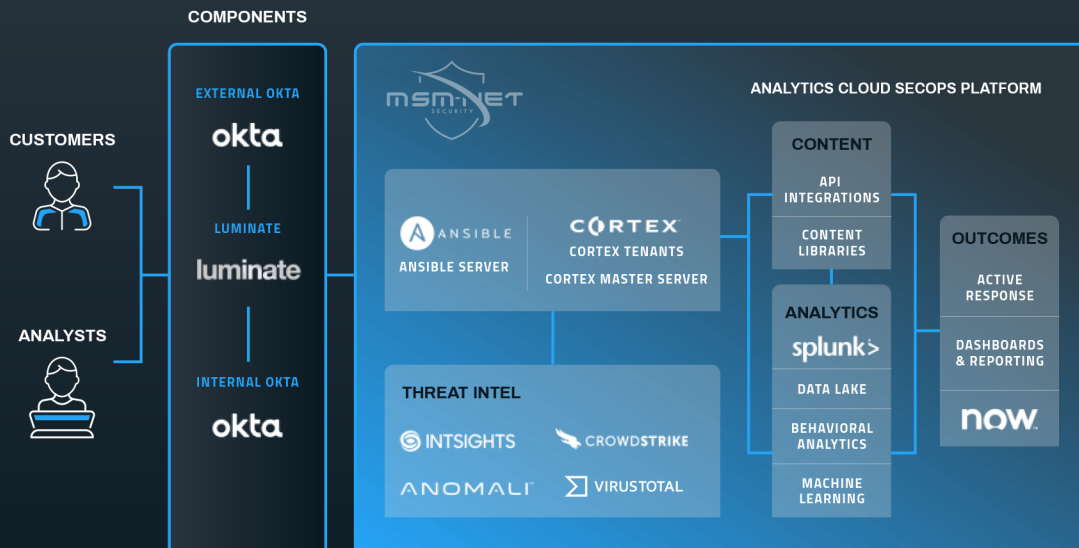

Our Team model guarantees continuity and context during shifts, ensuring seamless coverage of all facets of overseeing our clients' security activities. When an issue arises or a security event occurs, our customers have developed close relationships with the members of their allocated team and are aware of exactly who to contact for support. For the purpose of resolving security events, we work closely with the incident response teams of our clients. Due to the strong alignment of our Teams and the teams of our customers, we are able to reduce MTTD and MTTR while still preserving the brands and digital assets of our clients.

We benchmark our clients' security procedures on a constant basis. Taking into account their industry, the threat actors interested in their line of work, and a number of other variables, we apply the best practices in network protection for all of our clients. Our metrics-based Maturity Model, which serves as a benchmark for security maturity and a road map for improvement, is immediately accessible to our MDR customers.

Service Benefits & Differentiators

- ✓ 24/7/365 alert monitoring, escalation, and validation
- ✓ Comprehensive Platform Management
- ✓ Obtain access to the Exclusive Threat Detection Database
- ✓ Real-Time Threat Hunting
- ✓ Proven Cloud Architecture for Business Continuity
- ✓ Compliance with Evolving Regulatory Mandates (GDPR, HIPAA/HITECH, SOX, PCI DSS & more)
- ✓ Direct Cooperation with Team Security Specialists/Team
- ✓ Carefully Curated Threat Intelligence
- ✓ A proprietary engine for improving security maturity (using our Maturity Model to raise score)
- ✓ Advances in Behavioral Analytics and Machines Learning
- ✓ Integrations of Best of Breed Analytics Technologies
- ✓ All supported integrations have undergone thorough lab testing.
- ✓ Custom Policy Development & Enforcement
- ✓ Dashboards & Reporting
